

# Foot pump type UPTN5-02.SO454

12 MPa max 5 cm<sup>3</sup>/stroke

10.2007

## **APPLICATION**

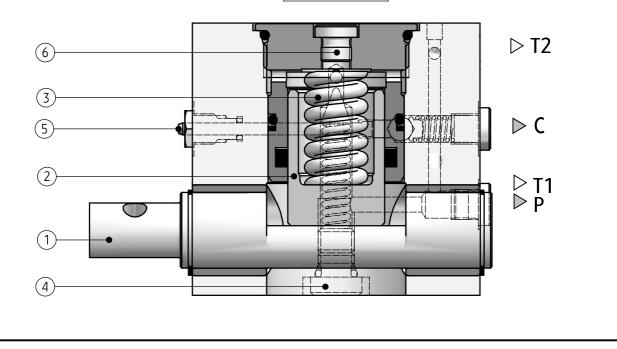

Foot pump type **UPTN5 - 02.S0454** is used to supply hydraulic systems by means of the lever driven by foot (or manually).

# **DESCRIPTION OF OPERATION**

To actuate the pump, the port **P** must be connected with the receiver and port **T1** or **T2** must be connected with a tank. The shaft of the pump (1) is driven by foot or manual lever coupled with the shaft (the lever should be ordered separately). Damping is the result of rotating the shaft (1) by 50° which puts the piston in the motion (2) and oil pressure increase in port **P**. The piston return (2) and the shaft return (1) together with the lever is forced by the spring (3), and then the oil is

### CAUTION:

Before first actuation, the pump must be bled. For this purpose, it is necessary to screw off the plug (6) and after bleeding, the plug (6) must be screwed tight. sucked from the tank and next working cycle of the pump is followed. The pressure of oil damping is set by means of the pressure control valve (4) within the range from 0 to 12MPa. Excess oil can be drained to the tank via unloading valve (5), equipped with the throttle valve preventing from sudden oil outflow.

UPTN5 - 02.SO454

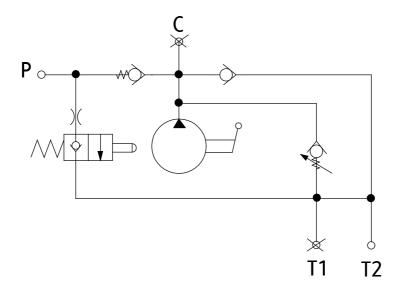

Type UPTN5-02.SO454

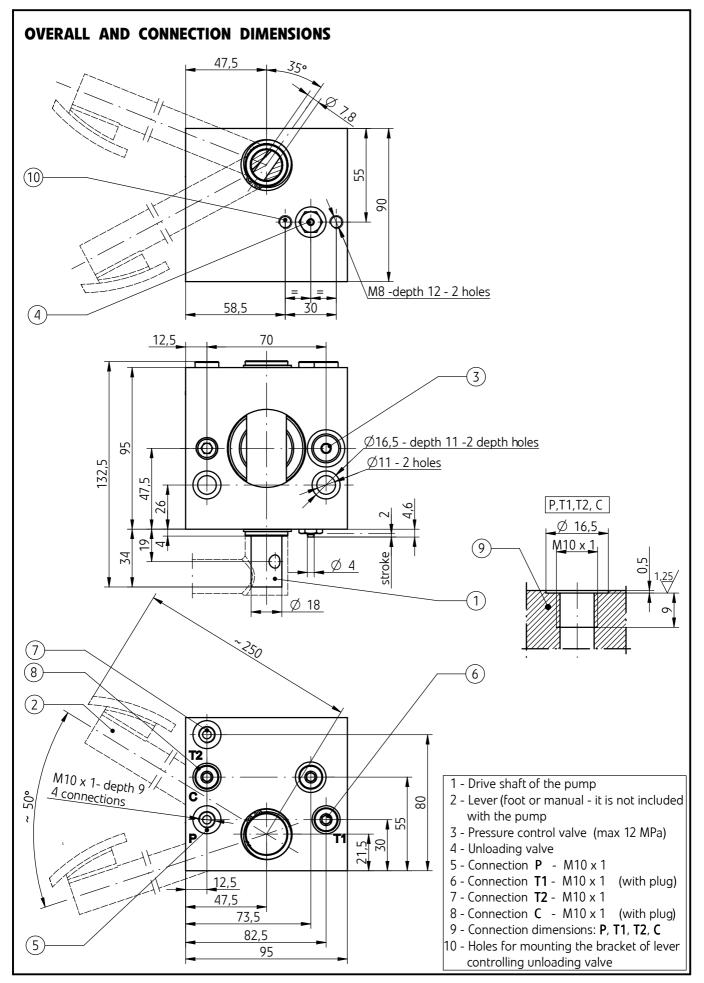

# **TECHNICAL DATA**

Hydraulic fluid	mineral oil	
Required filtration	υp to 16 μm	
Recommended filttration	υp to 10 μm	
Nominal fluid viscosity	10 up to 200 mm <sup>2</sup> /s	
Viscosity range	2,8 up to 380 mm <sup>2</sup> /s	
Fluid temperature range (in a tank)	recommended	40 ℃ up to 55 ℃
	max	-20°C up to +70°C
Ambient temperature range	- 20°C up to +70°C	
Maximum operating pressure	12 MPa	
Displacement	3 up to 5 cm <sup>3</sup> /stroke	
Degree of rotation of the pump shaft	~ 50 <sup>0</sup>	
Weight	6 kg	

# SCHEMES

Hydraulic scheme for the pump type UPTN5 - 02.SO454

WK 499 745 10.2007

Type UPTN5-02.SO454

## HOW TO ORDER

The pump should be ordered including the following type designation - **UPTN5 - 02.SO454**. Example coding: foot pump type UPTN5 - 02.SO454

## EXAMPLE OF APPLICATION IN HYDRAULIC SYSTEM
